Section 4: First-Aid Measures

Description of first aid measures

Inhalation

- First aid is not expected to be necessary if material is used under ordinary conditions and as recommended. If signs/symptoms develop, move person to fresh air. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing.

Skin

- First aid is not expected to be necessary if material is used under ordinary conditions and as recommended. Wash skin with soap and water.

Eye

- First aid is not expected to be necessary if material is used under ordinary conditions and as recommended. In case of contact with substance, immediately flush eyes with running water for at least 20 minutes.

Ingestion

- Ingestion is unlikely. Obtain medical attention immediately if ingested.

Most important symptoms and effects, both acute and delayed

- Under normal conditions of use, no health effects are expected.

Indication of any immediate medical attention and special treatment needed

Notes to Physician

- All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5: Fire-Fighting Measures

Extinguishing media

Suitable Extinguishing Media • TIRE OR VEHICLE FIRES: Use plenty of water - FLOOD it! If water is not available, use CO2, dry chemical or dirt.

Unsuitable Extinguishing Media • No data available

Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards • May rupture in fire. Products contained in unit are explosives and are extremely flammable and readily ignited.
Uncontained initiation of this device may expel shrapnel.
MAY EXPLODE AND THROW FRAGMENTS 1600 meters (1 MILE) OR MORE IF FIRE REACHES CARGO

Hazardous Combustion Products • No data available

Advice for firefighters

- Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.
- CARGO FIRES: DO NOT fight fire when fire reaches cargo! Cargo may EXPLODE!
- LARGE FIRES: Do not move cargo or vehicle if cargo has been exposed to heat.
- TIRE OR VEHICLE FIRES: If possible, and WITHOUT RISK, use unmanned hose holders or monitor nozzles from maximum distance to prevent fire from spreading to cargo area.

Section 6 - Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Personal Precautions • Do not walk through spilled material. DO NOT OPERATE RADIO TRANSMITTERS WITHIN 100 meters (330 feet) OF ELECTRIC DETONATORS

Emergency Procedures • Isolate spill or leak area immediately for at least 100 meters (330 feet) in all directions. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Move people out of line of sight of the scene and away from windows. Keep unauthorized personnel away. Stay upwind. Ventilate closed spaces before entering.

Environmental precautions

- No special precautions expected to be necessary if material is used under ordinary conditions and as recommended.

Methods and material for containment and cleaning up

Containment/Clean-up Measures • DO NOT CLEAN-UP OR DISPOSE OF, EXCEPT UNDER SUPERVISION OF A SPECIALIST
Cover any spilled or exposed material with vegetable oil or diesel fuel and remove for approved disposal.

Section 7 - Handling and Storage

Precautions for safe handling

Handling • Never drop, skid, cause impact to, expose to high heat, or slide packages containing class 1 materials. Keep away from heat, sparks, open flames and/or hot surfaces. - No smoking. All equipment used when handling the product must be grounded. Take precautionary measures against static charges. This product is an explosive and should only be used under the supervision of trained and licensed personnel. Use good safety and industrial hygiene practices. Wear appropriate personal protective equipment.

Conditions for safe storage, including any incompatibilities

Storage • Store assemblies in a properly sited and maintained magazine. Reference BATF, OSHA, DoD 4145.

Section 8 - Exposure Controls/Personal Protection

Control parameters

Exposure controls

Engineering Measures/Controls

- Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Use explosion-proof electrical/ventilating/lighting/equipment.

Personal Protective Equipment

Respiratory

- In case of insufficient ventilation, wear suitable respiratory equipment.

Eye/Face

- Wear safety glasses. Wear blast shields where necessary.

Hands

- Wear leather gloves under normal conditions. Wear PBI or leather gloves as outer shells with nitrile gloves as inserts under spill conditions.

Skin/Body

- Flame retardant coat (PBI or FR-7 cotton), grounding straps (Wrist and Leg) to prevent electrostatic discharge ignition.

Environmental Exposure Controls

- Controls should be engineered to prevent release to the environment, including procedures to prevent spills, atmospheric release and release to waterways. Follow best practice for site management and disposal of waste.
